- Pain point analysis.
- User flow creation.
- Wireframing.
- Mobile app UI design.
- Prototyping.

TOOLS:

- FIGMA
- CANVA

WEB TECHNOLOGIES:

- HTML
- CSS
- JAVASCRIPT

PROJECTS:

- **CampusBites - Student Lunch Pre-Order App**
Designed a mobile app that allows students to pre-order meals from the college cafeteria, reducing waiting time during breaks. Conducted user research, created user flows, wireframes, and high-fidelity UI screens using Figma to provide a smooth and intuitive ordering experience. Simplified the food ordering experience into a 3-step flow, reducing waiting time and improving usability during peak cafeteria hours.
- **DailySip – Drinking Water Reminder App**
Developed a mobile interface that helps users track and maintain daily water intake. Designed user-friendly notifications, goal tracking, and simple interactive screens in Figma, focusing on improving user health habits through an intuitive experience. Designed a simple reminder and tracking system to encourage consistent hydration habits through minimal user effort and clear visual feedback.
- **Farm2Market – Farmer to Market Supplier Shipment App**
Created a mobile app concept enabling farmers to send vegetable shipments directly to market suppliers. Conducted user interviews, identified supply chain communication challenges, and designed wireframes and UI screens in Figma to make the shipping process efficient and transparent. Streamlined the shipment process with a clear workflow, improving communication between farmers and buyers and making tracking more transparent.
- **ComfyWear - Women's Fashion Shopping App**
Created a fashion marketplace app UI in Figma with easy category browsing, brand filtering, wishlist, and size guide features. Added "Complete the Look" recommendations and a virtual try-on concept to help users make better outfit choices with confidence.
