PROFILE SUMMARY:

UI/UX Designer and MCA graduate with hands-on experience in user research, wireframing, prototyping, and mobile app interface design using Figma. Passionate about creating intuitive and user-centered digital experiences that solve real-world problems. Skilled in UX research, interaction design, responsive design principles, and usability-focused design thinking.

SKILLS

UX Skills: User Research & Interviews, Design Thinking, Pain Point Analysis, User Persona Creation, User Flow Design, Information Architecture, Wireframing, Usability Testing, Heuristic Evaluation, Responsive Design Concepts.

UI Skills: High-Fidelity UI Design, Mobile App UI Design, Prototyping, Component Design, Visual Design

Tools: Figma , Canva, Adobe xd .

Web Technologies: HTML, CSS, JavaScript.

PROJECTS

CampusBites – Student Lunch Pre-Order App

- Designed a mobile app that allows students to pre-order meals from the college cafeteria, reducing waiting time during breaks. Conducted user research, created user flows, wireframes, and high-fidelity UI screens using Figma to provide a smooth and intuitive ordering experience. Simplified the food ordering experience into a 3-step flow, reducing waiting time and improving usability during peak cafeteria hours.

DailySip – Drinking Water Reminder App

- Designed a mobile interface to help users build and maintain healthy hydration habits through goal tracking, reminders, and clear visual feedback. Applied user-centered design principles to create a minimal, accessible UI with simple interactive screens in Figma. Focused on reducing cognitive load by designing a clean reminder and tracking system that requires minimal user effort.

Farm2Market – Farmer to Market Supplier Shipment App

- Created a mobile app concept enabling farmers to send vegetable shipments directly to market suppliers. Conducted user interviews, identified supply chain communication challenges, and designed wireframes and UI screens in Figma to make the shipping process efficient and transparent. Streamlined the shipment process with a clear workflow, improving communication between farmers and buyers and making tracking more transparent.

ComfyWear - Women's Fashion Shopping App

- Created a fashion marketplace app UI in Figma with easy category browsing, brand filtering, wishlist, and size guide features. Added "Complete the Look" recommendations and a virtual try-on concept to help users make better outfit choices with confidence.
